The Foundational Impact of Recursion Theory

*A conference in honor of
Steve Simpson's 70th birthday*

About the conference

Recursion theory has many deep applications in the study of foundations of mathematics. This conference aims to bring together researchers working in all aspects and foundational applications of recursion theory.

The conference will be held at the same location as the 2016 Association for Symbolic Logic North American Annual Meeting, which begins the following day.

Website and registration

Additional information can be found at the conference website

<http://www.marshall.edu/math/FIRT16/>

There is no registration fee, but participants are encouraged to register as soon as possible.

Conference organizers

Jeffrey L. Hirst
Appalachian State University

Alberto Marcone
Università di Udine

Carl Mummert
Marshall University

Speakers

Stephen Flood
Bridgewater State University

François G. Dorais
University of Vermont

Carl Jockusch
University of Illinois
at Urbana-Champaign

Ludovic Patey
Université Paris Diderot (VII)

Antonio Montalbán
University of California, Berkeley

Gerald Sacks
Massachusetts Institute of Technology

Paul Shafer
University of Ghent

Richard Shore
Cornell University

Ted Slaman
University of California, Berkeley
